# Index to Volume 151

## Alphabetical Table of Contents of Authors

*Antonovics, Janis.* See *Peter H. Thrall*
*Arneberg, Per, Arne Skorping, and Andrew F. Read.* Parasite abundance, body size, life histories, and the energetic equivalence rule, 497
*Arnqvist, Göran.* See *Paul J. Watson*
*Avise, John C.* See *Paulo A. Prodöhl*

*Bailey, B. A.* See *S. P. Ellner*
*Bernays, E. A.* The value of being a resource specialist: behavioral support for a neural hypothesis, 451
*Bigger, D.* See *D. F. Doak*
*Blackburn, Tim M., and Kevin J. Gaston.* Some methodological issues in macroecology, 68
*Blows, Mark W.* Evolution of a mate recognition system after hybridization between two *Drosophila* species, 538
*Bobashev, G. V.* See *S. P. Ellner*
*Borash, Daniel J., Allen G. Gibbs, Amitabh Joshi, and Laurence D. Mueller.* A genetic polymorphism maintained by natural selection in a temporally varying environment, 148
*Bristow, Charles E.* See *David Tilman*

*Camill, Philip, and James S. Clark.* Climate change disequilibrium of boreal permafrost peatlands caused by local processes, 207
*Clark, James S.* See *Philip Camill*
*Connolly, Sean R., and Jonathan Roughgarden.* A latitudinal gradient in northeast Pacific intertidal community structure: evidence for an oceanographically based synthesis of marine community theory, 311

*Danchin, Etienne.* See *Cecile Rolland*
*de Fraipont, Michelle.* See *Cecile Rolland*
*Doak, D. F., D. Bigger, E. K. Harding, M. A. Marvier, R. E. O'Malley, and D. Thomson.* The statistical inevitability of stability-diversity relationships in community ecology, 264

*Eadie, John McA., and Bruce E. Lyon.* Cooperation, conflict, and crèching behavior in goldeneye ducks, 397
*Edwards, A. W. F.* Natural selection and the sex ratio: Fisher's sources, 564
*Ellner, S. P., B. A. Bailey, G. V. Bobashev, A. R. Gallant, B. T. Grenfell, and D. W. Nychka.* Noise and nonlinearity in measles epidemics: combining mechanistic and statistical approaches to population modeling, 425
*Engen, Steinar.* See *Bernt-Erik Sæther*

*Ferrario, Silvia.* See *Anders Pape Møller*
*Field, Jeremy, Carlos R. Solís, David C. Queller, and Joan E. Strassmann.* Social and genetic structure of paper wasp cofoundress associations: tests of reproductive skew models, 545
*Fitzpatrick, Susan.* Birds' tails as signaling devices: markings, shape, length, and feather quality, 157
*Fulbright, Dennis W.* See *Douglas R. Taylor*
*Futuyma, Douglas J.* Wherefore and whither the naturalist? 1

*Galeotti, Paolo.* See *Anders Pape Møller*
*Gallant, A. R.* See *S. P. Ellner*
*Gaston, Kevin J.* See *Tim M. Blackburn*
*Gerry, Ann K.* See *Duane A. Peltzer*
*Gibbs, Allen G.* See *Daniel J. Borash*
*Godin, Jean-Guy J.* See *Krista J. Patriquin-Meldrum*
*Gregory, Patrick T., and Kristina M. Skebo.* Trade-offs between reproductive traits and the influence of food intake during pregnancy in the garter snake, *Thamnophis elegans*, 477
*Grenfell, B. T.* See *S. P. Ellner*
*Griesemer, James R.* See *Michael J. Wade*
*Groom, Martha J.* Allee effects limit population viability of an annual plant, 487
*Grünbaum, Daniel.* Using spatially explicit models to characterize foraging performance in heterogeneous landscapes, 97

*Harada, Yuko.* See *Yoh Iwasa*
*Harding, E. K.* See *D. F. Doak*
*Hardy, Ian C. W.* See *Peter J. Mayhew*
*Hassell, M. P.* See *H. B. Wilson*
*Haydock, Joseph.* See *Walter D. Koenig*
*Holmes, E. E., and H. B. Wilson.* Running from trouble: long-distance dispersal and the competitive coexistence of inferior species, 578
*Holt, R. D.* See *H. B. Wilson*

*Islam, Aminul.* See *Bernt-Erik Sæther*
*Iwasa, Yoh, and Yuko Harada.* Female mate preference to maximize paternal care. II. Female competition leads to monogamy, 367

*Jaenike, John.* On the capacity of macroparasites to control insect populations, 84
*James, Avis C., and Linda Partridge.* Geographic variation in competitive ability in *Drosophila melanogaster*, 530
*Jarosz, Andrew M.* See *Douglas R. Taylor*
*Joshi, Amitabh.* See *Daniel J. Borash*

*Kaitala, Veijo.* See *Jörgen Ripa*
*Klein, Sabra L., and Randy J. Nelson.* Adaptive immune responses are linked to the mating system of arvicoline rodents, 59
*Koenig, Walter D., Joseph Haydock, and Mark T. Stanback.* Reproductive roles in the cooperatively breeding acorn woodpecker: incest avoidance versus reproductive competition, 243
*Kraus, Bernhard, and Robert E. Page, Jr.* Parasites, pathogens, and polyandry in social insects, 383

*Latta, Robert G.* Differentiation of allelic frequencies at quantitative trait loci affecting locally adaptive traits, 283
*Lee, Carol Eunmi, and Richard R. Strathmann.* Scaling of gelatinous clutches: effects of siblings' competition for oxygen on clutch size and parental investment per offspring, 293
*Lehman, Clarence L.* See *David Tilman*
*Lenski, Richard E.* See *Douglas R. Taylor*
*Loughry, W. J.* See *Paulo A. Prodöhl*
*Lundberg, Per.* See *Jörgen Ripa*
*Lyon, Bruce E.* See *John McA. Eadie*

*Marvier, M. A.* See *D. F. Doak*
*Mauricio, Rodney.* Costs of resistance to natural enemies in field populations of the annual plant, *Arabidopsis thaliana*, 20
*Mayhew, Peter J., and Ian C. W. Hardy.* Nonsiblicidal behavior and the evolution of clutch size in bethylid wasps, 409
*McCleery, Robin.* See *Bernt-Erik Sæther*
*McDonough, Colleen M.* See *Paulo A. Prodöhl*
*Møller, Anders Pape, Nicola Saino, Graziana Taramino, Paolo Galeotti, and Silvia Ferrario.* Paternity and multiple signaling: effects of a secondary sexual character and song on paternity in the barn swallow, 236

*Møller, A. P., and R. Thornhill.* Bilateral symmetry and sexual selection: a meta-analysis, 174
*Mueller, Laurence D.* See *Daniel J. Borash*

*Nelson, Randy J.* See *Sabra L. Klein*
*Nelson, William S.* See *Paulo A. Prodöhl*
*Nychka, D. W.* See *S. P. Ellner*

*O'Malley, R. E.* See *D. F. Doak*

*Page, Robert E., Jr.* See *Bernhard Kraus*
*Partridge, Linda.* See *Avis C. James*
*Patriquin-Meldrum, Krista J., and Jean-Guy J. Godin.* Do female three-spined sticklebacks copy the mate choice of others? 570
*Peltzer, Duane A., Scott D. Wilson, and Ann K. Gerry.* Competition intensity along a productivity gradient in a low-diversity grassland, 465
*Perrins, Christopher.* See *Bernt-Erik Sæther*
*Prodöhl, Paulo A., W. J. Loughry, Colleen M. McDonough, William S. Nelson, Elizabeth A. Thompson, and John C. Avise.* Genetic maternity and paternity in a local population of armadillos assessed by microsatellite DNA markers and field data, 7

*Queller, David C.* See *Jeremy Field*

*Read, Andrew F.* See *Per Arneberg*
*Reeve, Hudson K.* See *Paul W. Sherman*
*Ripa, Jörgen, Per Lundberg, and Veijo Kaitala.* A general theory of environmental noise in ecological food webs, 256
*Robinson, Beren W.,* and *David Sloan Wilson.* Optimal foraging, specialization, and a solution to Liem's paradox, 223
*Rolland, Cecile, Etienne Danchin, and Michelle de Fraipont.* The evolution of coloniality in birds in relation to food, habitat, predation, and life-history traits: a comparative analysis, 514
*Roughgarden, Jonathan.* See *Sean R. Connolly*

*Sæther, Bernt-Erik, Steinar Engen, Aminul Islam, Robin McCleery, and Christopher Perrins.* Environmental stochasticity and extinction risk in a population of a small songbird, the great tit, 441
*Saino, Nicola.* See *Anders Pape Møller*
*Schmitz, Oswald J.* Direct and indirect effects of predation and predation risk in old-field interaction webs, 327
*Seeley, Thomas D.* See *Paul W. Sherman*
*Sherman, Paul W., Thomas D. Seeley, and Hudson K. Reeve.* Parasites, pathogens, and polyandry in honey bees, 392
*Skebo, Kristina M.* See *Patrick T. Gregory*
*Skorping, Arne.* See *Per Arneberg*
*Smulders, Tom V.* A game theoretical model of the evolution of food hoarding: applications to the Paridae, 356
*Solís, Carlos R.* See *Jeremy Field*
*Stanback, Mark T.* See *Walter D. Koenig*
*Strassmann, Joan E.* See *Jeremy Field*
*Strathmann, Richard R.* See *Carol Eunmi Lee*

*Takasu, Fugo.* Why do all host species not show defense against avian brood parasitism: evolutionary lag or equilibrium? 193
*Taramino, Graziana.* See *Anders Pape Møller*
*Taylor, Douglas R., Andrew M. Jarosz, Richard E. Lenski, and Dennis W. Fulbright.* The acquisition of hypovirulence in host-pathogen systems with three trophic levels, 343
*Thompson, Elizabeth A.* See *Paulo A. Prodöhl*
*Thomson, D.* See *D. F. Doak*
*Thornhill, R.* See *A. P. Møller*
*Thrall, Peter H., Janis Antonovics, and William G. Wilson.* Allocation to sexual versus nonsexual disease transmission, 29
*Tilman, David, Clarence L. Lehman, and Charles E. Bristow.* Diversity-stability relationships: statistical inevitability or ecological consequence? 277

*Wade, Michael J., and James R. Griesemer.* Populational heritability: empirical studies of evolution in metapopulations, 135
*Watson, Paul J., Göran Arnqvist, and Robert R. Stallmann.* Sexual conflict and the energetic costs of mating and mate choice in water striders, 46
*Wilson, David Sloan.* See *Beren W. Robinson*
*Wilson, H. B., M. P. Hassell, and R. D. Holt.* Persistence and area effects in a stochastic tritrophic model, 587
———. See *E. E. Holmes*
*Wilson, Scott D.* See *Duane A. Peltzer*
*Wilson, William G.* Resolving discrepancies between deterministic population models and individual-based simulations, 116
———. See *Peter H. Thrall*

## Alphabetical Table of Contents of Titles

The acquisition of hypovirulence in host-pathogen systems with three trophic levels. Douglas R. Taylor, Andrew M. Jarosz, Richard E. Lenski, and Dennis W. Fulbright, 343
Adaptive immune responses are linked to the mating system of arvicoline rodents. Sabra L. Klein and Randy J. Nelson, 59
Allee effects limit population viability of an annual plant. Martha J. Groom, 487
Allocation to sexual versus nonsexual disease transmission. Peter H. Thrall, Janis Antonovics, and William G. Wilson, 29

Bilateral symmetry and sexual selection: a meta-analysis. A. P. Møller and R. Thornhill, 174
Birds' tails as signaling devices: markings, shape, length, and feather quality. Susan Fitzpatrick, 157

Climate change disequilibrium of boreal permafrost peatlands caused by local processes. Philip Camill and James S. Clark, 207
Competition intensity along a productivity gradient in a low-diversity grassland. Duane A. Peltzer, Scott D. Wilson, and Ann K. Gerry, 465
Cooperation, conflict, and crèching behavior in goldeneye ducks. John McA. Eadie and Bruce E. Lyon, 397
Costs of resistance to natural enemies in field populations of the annual plant, *Arabidopsis thaliana.* Rodney Mauricio, 20

Differentiation of allelic frequencies at quantitative trait loci affecting locally adaptive traits. Robert G. Latta, 283
Direct and indirect effects of predation and predation risk in old-field interaction webs. Oswald J. Schmitz, 327

Diversity-stability relationships: statistical inevitability or ecological consequence? David Tilman, Clarence L. Lehman, and Charles E. Bristow, 277
Do female three-spined sticklebacks copy the mate choice of others? Krista J. Patriquin-Meldrum and Jean-Guy J. Godin, 570

Environmental stochasticity and extinction risk in a population of a small songbird, the great tit. Bernt-Erik Sæther, Steinar Engen, Aminul Islam, Robin McCleery, and Christopher Perrins, 441
Evolution of a mate recognition system after hybridization between two *Drosophila* species. Mark W. Blows, 538
The evolution of coloniality in birds in relation to food, habitat, predation, and life-history traits: a comparative analy-

sis. Cecile Rolland, Etienne Danchin, and Michelle de Fraipont, 514

Female mate preference to maximize paternal care. II. Female competition leads to monogamy. Yoh Iwasa and Yuko Harada, 367

A game theoretical model of the evolution of food hoarding: applications to the Paridae. Tom V. Smulders, 356

A general theory of environmental noise in ecological food webs. Jörgen Ripa, Per Lundberg, and Veijo Kaitala, 256

Genetic maternity and paternity in a local population of armadillos assessed by microsatellite DNA markers and field data. Paulo A. Prodöhl, W. J. Loughry, Colleen M. McDonough, William S. Nelson, Elizabeth A. Thompson, and John C. Avise, 7

A genetic polymorphism maintained by natural selection in a temporally varying environment. Daniel J. Borash, Allen G. Gibbs, Amitabh Joshi, and Laurence D. Mueller, 148

Geographic variation in competitive ability in *Drosophila melanogaster.* Avis C. James and Linda Partridge, 530

A latitudinal gradient in northeast Pacific intertidal community structure: evidence for an oceanographically based synthesis of marine community theory. Sean R. Connolly and Jonathan Roughgarden, 311

Natural selection and the sex ratio: Fisher's sources. A. W. F. Edwards, 564

Noise and nonlinearity in measles epidemics: combining mechanistic and statistical approaches to population modeling. S. P. Ellner, B. A. Bailey, G. V. Bobashev, A. R. Gallant, B. T. Grenfell, and D. W. Nychka, 425

Nonsiblicidal behavior and the evolution of clutch size in bethylid wasps. Peter J. Mayhew and Ian C. W. Hardy, 409

On the capacity of macroparasites to control insect populations. John Jaenike, 84

Optimal foraging, specialization, and a solution to Liem's paradox. Beren W. Robinson and David Sloan Wilson, 223

Parasite abundance, body size, life histories, and the energetic equivalence rule. Per Arneberg, Arne Skorping, and Andrew F. Read, 497

Parasites, pathogens, and polyandry in honey bees. Paul W. Sherman, Thomas D. Seeley, and Hudson K. Reeve, 392

Parasites, pathogens, and polyandry in social insects. Bernhard Kraus and Robert E. Page, Jr., 383

Paternity and multiple signaling: effects of a secondary sexual character and song on paternity in the barn swallow. Anders Pape Møller, Nicola Saino, Graziana Taramino, Paolo Galeotti, and Silvia Ferrario, 236

Persistence and area effects in a stochastic tritrophic model. H. B. Wilson, M. P. Hassell, and R. D. Holt, 587

Populational heritability: empirical studies of evolution in metapopulations. Michael J. Wade and James R. Griesemer, 135

Reproductive roles in the cooperatively breeding acorn woodpecker: incest avoidance versus reproductive competition. Walter D. Koenig, Joseph Haydock, and Mark T. Stanback, 243

Resolving discrepancies between deterministic population models and individual-based simulations. William G. Wilson, 116

Running from trouble: long-distance dispersal and the competitive coexistence of inferior species. E. E. Holmes and H. B. Wilson, 578

Scaling of gelatinous clutches: effects of siblings' competition for oxygen on clutch size and parental investment per offspring. Carol Eunmi Lee and Richard R. Strathmann, 293

Sexual conflict and the energetic costs of mating and mate choice in water striders. Paul J. Watson, Göran Arnqvist, and Robert R. Stallmann, 46

Social and genetic structure of paper wasp cofoundress associations: tests of reproductive skew models. Jeremy Field, Carlos R. Solís, David C. Queller, and Joan E. Strassmann, 545

Some methodological issues in macroecology. Tim M. Blackburn and Kevin J. Gaston, 68

The statistical inevitability of stability-diversity relationships in community ecology. D. F. Doak, D. Bigger, E. K. Harding, M. A. Marvier, R. E. O'Malley, and D. Thomson, 264

Trade-offs between reproductive traits and the influence of food intake during pregnancy in the garter snake, *Thamnophis elegans.* Patrick T. Gregory and Kristina M. Skebo, 477

Using spatially explicit models to characterize foraging performance in heterogeneous landscapes. Daniel Grünbaum, 97

The value of being a resource specialist: behavioral support for a neural hypothesis. E. A. Bernays, 451

Wherefore and whither the naturalist? Douglas J. Futuyma, 1

Why do all host species not show defense against avian brood parasitism: evolutionary lag or equilibrium? Fugo Takasu, 193

## Alphabetical Table of Keywords

abundance, 68, 497
acorn woodpecker, 243
adaptive radiation, 223
adoption, 397
*Agropyron cristatum,* 465
Allee effects, 487
allometry, 293
ammonia, 148
antibody, 59
*Apis mellifera,* 383
*Arabidopsis thaliana,* 20
area effects, 587
area-restricted search, 97
assortative mating, 367
attractiveness, 236
averaging, 264
avian brood parasitism, 193

Bethylidae, 409
biological control, 84, 343
body size, 68, 409, 497, 530
boreal forest, 207
brown-headed cowbird, 193
*Bucephala islandica,* 397

carbon, 207
care graph, 367
cellular automata, 578
chestnut blight, 343
*Clarkia concinna,* 487

climate change, 207
clines, 530
clutch, 293
clutch size, 409
*Coccinella septempunctata,* 97
coexistence, 223, 578
coloniality, 514
coloration, 157
common cuckoo, 193
community ecology, 264, 277
community structure, 311
comparative analysis, 514
competition, 223, 277, 465, 578
cooperative breeding, 243
copying, 570
cost, 20
crèching, 397

Darwin, 564
defense, 20
demographic stochasticity, 587
density dependence, 441
density-dependent selection, 148
density-mediated indirect effects, 327
desertion, 397
developmental instability, 174
diet breadth, 451
disease evolution, 29
disease resistance, 392
dispersal, 578
distribution, 68
diversity, 264, 277
*Drosophila,* 84
*Drosophila birchii,* 538
*Drosophila melanogaster,* 148, 530
*Drosophila serrata,* 538

ecological laws, 497
egg mass, 293
endocrine-immune interactions, 59
energetics, 46
environmental stochasticity, 256, 441
evolution, 356
extinction, 441, 487

feeding, 477
feeding behavior, 451
fish, 570
Fisher, 564
fluctuating asymmetry, 174
food, 514
food hoarding, 356
food web interactions, 327
food webs, 256
free-living animals, 497

game theory, 356
garter snakes, 477
gel, 293
generalist, 223
generalized parasite, 193
genetic correlation, 538
genetic markers, 7
genetic variation, 383
Gerridae, 46
goldeneye, 397
gradient, 465
great tit, 441

habitat, 514
handicaps, 157, 236
herbivores, 20
*Hirundo rustica,* 236
honey bees, 392
host defense, 193
host-parasite interactions, 84
*Howardula,* 84
humoral immunity, 59
hybridization, 538
hyperparasite, 343
hypovirulence, 343

incest avoidance, 243
indirect effects, 327
individual-based models, 116
information overload, 451
insects, 84
interdemic selection, 135
intertidal community, 311

kinship, 7

larval competition, 530
life history, 477
life-history traits, 514
linkage disequilibrium, 283
local adaptation, 283
local Lyapunov exponents, 425
long-range dispersal, 116
loop, 367

macroecology, 68
mate choice, 46, 174, 236, 570
mating behavior, 29
mating graph, 367
mean and variance, 277
measles, 425
meta-analysis, 174
metapopulations, 135, 587
methodology, 68
microsatellite loci, 7
microsatellites, 545
microtine rodents, 59
modeling, 425
models, 207
monogamy, 367
multilocus differentiation, 283
multiple mating, 392

natural selection, 564
nematodes, 84
nest predation, 514
neural constraint, 451
nitrogen, 465
nitrogen wastes, 148
null model, 264

old-field arthropods, 327
old-field experiment, 465
optimal foraging theory, 223
oxygen diffusion, 293

parasites, 383, 497
parasitoid, 409
parentage, 7
parental care, 397
parent-offspring conflict, 409
Paridae, 356
paternal care, 367
pathogens, 20
peatland, 207
permafrost, 207
pleiotropy, 538
*Polistes,* 545
pollination, 487
polyandry, 383, 392
populational heritability, 135
population dynamics, 256, 425
population structure, 7
population viability, 441
power spectra, 256
predation, 327
predator-prey theory, 116
pregnancy, 477
productivity, 465

quality indicators, 157
quantitative trait loci, 283

random walk, 97
random sums, 264
recruitment, 311
relatedness, 545
reproduction, 477
reproductive competition, 243
reproductive skew, 545
resistance, 20
resource specialization, 451
respirometry, 46

secondary sexual characters, 174
sex differences, 59
sex ratio, 564
sexual conflict, 46
sexual selection, 157, 174, 236, 538, 570
siblicide, 409
sibling competition, 293
signals, 157

social behavior, 29
spatial dynamics, 116
spatial models, 578
spatial statistics, 97
specialist, 223
specialized parasite, 193
sperm competition, 236
stability, 264, 277
stickleback, 570
stochastic population models, 441
